PROFILE

Cloud & DevOps engineer with an AWS Certified Solutions Architect – Associate certification and a low-level systems background from 42 School. I build automated, reproducible and observable AWS infrastructure as code with Terraform, Ansible, Docker and GitHub Actions CI/CD, and publish it as open projects. A decade in professional esports and poker shaped my approach to decision-making under pressure and incomplete information.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03)

Amazon Web Services · 2026

[Verify on Credly](#)

EF SET English Certificate – C1 Advanced

EF SET · 2026

[Verify certificate](#)

SELECTED PROJECTS

Sentinel · AI-driven SRE context engine

Go · Linux · Docker · Gemini API · Prometheus · Grafana

Go CLI and containerized daemon (UNIX socket IPC, read-only rootfs) that turn host telemetry, service logs and workspace code into sanitized context for Gemini, returning root-cause hypotheses and next steps in the terminal.

[GitHub ↗](#)

CloudForge · Automated cloud infrastructure & IaC

AWS · Terraform · Ansible · Docker · Nginx · GitHub Actions

Reproducible AWS deployment with strict layer separation: Terraform provisions VPC, security groups and EC2, Ansible hardens the host and manages secrets with Vault, Docker Compose runs the stack behind Nginx with TLS. One-command deploy and teardown.

[GitHub ↗](#)

danoguer.me · Serverless portfolio on AWS

CloudFront · S3 · Lambda@Edge · Lambda (Go) · SES · Route 53 · ACM · DynamoDB · Terraform

Serverless portfolio provisioned with Terraform and deployed via GitHub Actions with OIDC (no long-lived AWS keys).

Private S3 origin behind CloudFront OAC, edge security headers with Lambda@Edge, Go Lambda contact form with SES.

TECHNICAL SKILLS

Cloud	AWS (EC2, VPC, S3, IAM, CloudFront, Lambda, Route 53)
IaC & CI/CD	Terraform, Ansible (Vault), GitHub Actions (OIDC)
Containers & observability	Docker, Nginx, Prometheus, Grafana
Systems & languages	Linux, Bash, Go, C, C++
Spoken languages	Spanish (native) · English (C1 Advanced, EF SET certified)

EDUCATION

42 School · Common Core completed

2025–2026

Project-based, peer-to-peer software engineering school with no lectures or teachers. Low-level work on processes, memory management, signals, concurrency, POSIX sockets and Unix systems. Admitted through the 26-day C Piscine (Apr–May 2025).

PREVIOUS EXPERIENCE

Professional esports player – League of Legends

LLN & LVP · 2014–2019

Starting top laner for Infinity eSports in the opening season of Latin America North (LLN); won the regular season of Spain's División de Honor (Season 11) with ASUS ROG Army. Team play and structured post-match VOD analysis at a professional level.

Professional poker player – self-employed

2020–2024

Independent high-stakes cash game player. Risk and bankroll management, probability modeling and data-driven review of hand histories with tracking software.
